## TLDR

Battle Week is a week-long contest where Algorilla Army holders go head-to-head for a prize. The battle winners will be determined by the battle bot. Each participant will be assigned a randomly generated list of 10 battles and have 7 days to complete them. Each battle week, a series of traits will be chosen and given a boost to enhance their overall rarity score and increase their odds of winning a battle. Prizes will be given out each Battle Week (ALGO, NFTs, WL spots, and who knows what else!).

## Signup

1. Register the wallet holding your AGAs using the **/register** command
  - Pro tip: Use the **/wallet\_info** command to see your current AGA holdings. Listed AGAs are excluded.
2. Add at least one of your AGAs to the battle week using the **/add** command
  - Pro tip: if there is a giveaway, the more AGAs you have the more chances you have to win the giveaway

## Gameplay

Once the Battle Week has started, you will be able to view your battle list using the **/weekly\_battles** command. You will have one week to complete the battles shown on your battle list using the **/battle** command. As you progress through your battles, they will be updated to strikethrough text on your battle list and show up in the weekly battle stats shown by the **/my\_stats** command. Once you complete all your battles, you're good to go! Sit back, relax, and periodically check the leaderboard using the **/leaderboard** command to see where you stand.

# Battle Bot Commands

## /register

- Register your wallet address or NFD with the battle bot

**input** The NFD or wallet address you would like to register

 **/register**  

## /wallet\_info

- Show the list AGAs held by the wallet registered by the user. Listed AGA are excluded.

**/weekly\_battles** See your list of weekly battles

 **/weekly\_battles**

## /add

- Add an AGA to the battle list. This makes the AGA available for battle and signs you up for any future Battle Weeks.

**number** The number of AGA you would like to add to the list of battle ...

 **/add**  

## /remove

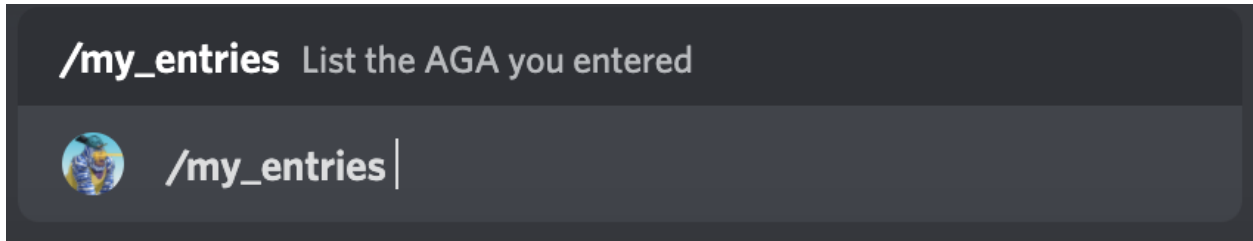

- Remove an AGA from your battle list. You can only battle with AGAs that are in your wallet

**number** The number of AGA you would like to remove from the list of...

 **/remove**  

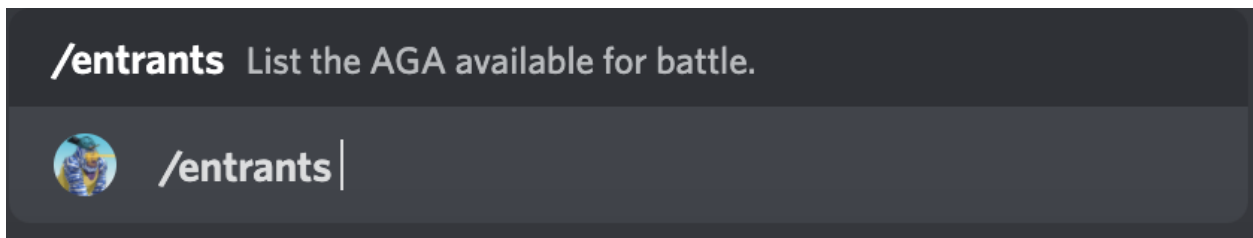

## /my\_entries

- Show all of the AGAs added to the battle list by the user

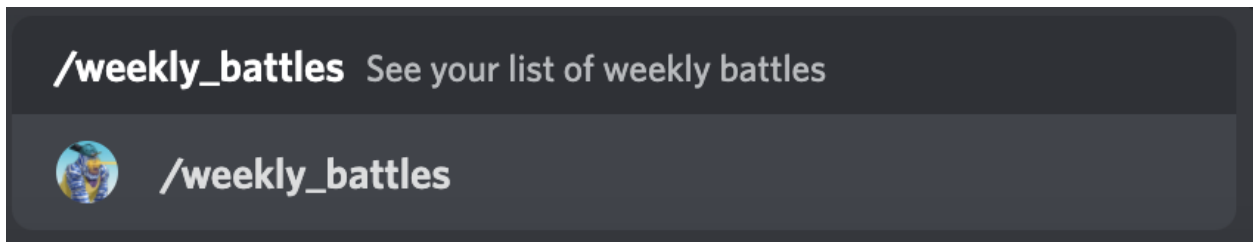

## /entrants

- show the list of AGAs that are available for battling

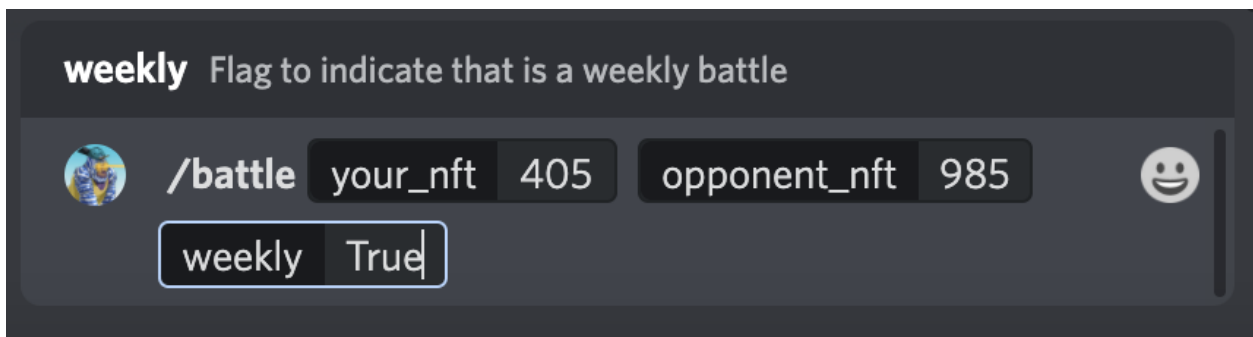

## /weekly\_battles

- Show the list of weekly battles you have been assigned. After a battle is completed, the corresponding entry will be shown with strikethrough text.

## /battle

- Battle an available AGA using the battle bot.. To conduct a weekly battle, you need to pass the **weekly** argument like you see below. If not, it will only count towards your all time record.

## /my\_stats

- List your all time battle stats and your weekly battle stats

**/my\_stats** Get your win/loss record

**/my\_stats**
